Indianford Dam Powerhouse Trash Rack Cleaning
Town of Fulton, Rock County, WI

The Rock-Koshkonong Lake District (RKLD) seeks a qualified contractor to perform routine dam work in support of the governed regulations and SOP; to provide debris removal and daily data entry of water levels as reported by USGS; and updates to the WDNR and RKLD according to policies and procedures provided.

This can be an individual or company who provides this service. Water level reporting will need to be done 365 days a year as required by the WDNR.

The powerhouse wicket gates and opposite shore slide gates shall be maintained in an operable condition. All organic debris will be periodically removed from the intake to insure unobstructed water discharge. During the spring and fall, the trash racks are cleaned several times per week. During summer and winter, the trash racks typically remain free of debris, as wicket gates are closed during low flow periods.

The wicket gates are closed to facilitate the cleaning operations. All organic debris removed from the trash racks is transferred back into the river downstream from the dam. All non-biodegradable materials removed from the trash racks and properly disposed in onsite dumpsters.

All safety precautions and procedures will be used whenever on the premises with no exception to the rules. This work is subject to inclement weather and varying water levels. Appropriate apparel and safety equipment will be required by the said individual or company. Property will remain locked and secure prior to and after leaving the premises.

Liability insurance will be required. RKLD will consider either an hourly rate or a monthly stipend for remuneration as non-employee compensation.

Deadline for submitting proposals - Must be postmarked no later than Friday, December 30, 2016, and mailed to:

RKLD
