RE: North Shore Road Demands

I have included the meeting minutes from our 5-16-13 Board of Commissioner Meeting where - on a 5-1 majority vote - the board authorized me to extend the amount of \$2,500 to be counted as a contribution towards the town's road repairs.

Please note language of the memo to the town chairman - included.

The Board has held 4 meetings since extending this offer and has yet to receive a response. And that offer remains today.

Please note the written testimony also included from Badgerland, as well as from the engineering firm that oversaw this project on behalf of RKLD. Not only is it the opinion of the RKLD Board that the town's demand is egregious, we are also of the opinion that a court granting "treble damages" is highly unlikely.

RKLD is a statutorily created local unit of government under Chapter 33 of the WI State Statutes.

The program that required ingress and egress from the Towns of Sumner and Koshkonong is called "PAS" and our partners are the US Army Corp. Of Engineers and the WI DNR. RKLD would point you to Chapter 30.2025 of the WI State Statutes as well.

At this point, our board considers this matter closed, unless Sumner choses to accept our contribution, then I will instruct our treasurer to issue payment.

Please be advised that we have instructed Badgerland that they will be defended by RKLD should the town of Sumner pursue litigation against our contractor.
