

**Construction begins on the
Lake Koshkonong Dredging and Shoreline Restoration Project
Town of Sumner, Jefferson County**

The Rock-Koshkonong Lake District (RKLD) is beginning construction of the Lake Koshkonong Dredging and Shoreline Restoration Project. This project is intended to provide an example of shoreline navigation access dredging combined with shoreline protection and wetland restoration that could be also valuable to implement in other areas of Lake Koshkonong. This project will remove lakebed sediment near the North Shore launch ramp and use the sediment to repair shoreline protection and restore an eroded wetland area separating Mud Lake from Lake Koshkonong. After construction is complete, the dredge and fill areas will be monitored for performance. This project was identified as part of the comprehensive Lake Koshkonong project conducted by RKLD, the Wisconsin DNR, and the U.S. Army Corps of Engineers. Construction of the project is being supported by Wisconsin DNR grant. All necessary permits have been obtained from the US Army Corps of Engineers, the Wisconsin DNR, Jefferson County, the Town of Sumner, and the Town of Koshkonong. Details include:

What: Excavating lakebed material from Lake Koshkonong, transporting along the lakeshore, and placement of the excavated material to provide shoreline protection and wetland restoration.

Where: The dredging will occur offshore of the North Shore boat launch, and the containment berm and dredge fill material will be placed along Lake Koshkonong adjacent to the Twin Islands Gun Club property. The excavated dredge material will be hauled from the launch ramp to the placement area along the frozen shoreline of Lake Koshkonong. The staging area will be on land owned by Jefferson County adjacent to the boat launch. Please see the attached map for details.

When: Construction is scheduled to begin the week of January 21, 2013 and is expected to be complete by February 28. Later in the spring of 2013, the lakebed material placed behind the containment berm will be planted with wetland vegetation.

Who: The construction contractor is Badgerland Excavating. Montgomery Associates, Resource Solutions is the design engineer and will be managing the project on behalf of RKLD. Please contact the personnel listed below with any questions or concerns:

Contractor:

Kevin Hahn, Badgerland Excavating
Cell phone: (608) 333-5607 Email: kevin@badgerlandexcavating.com

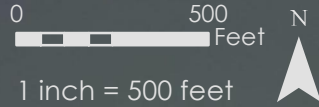

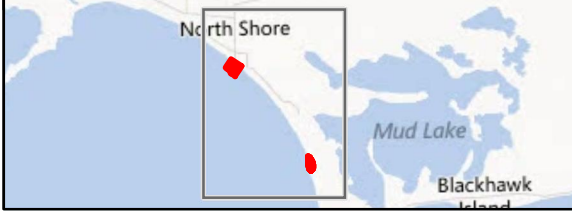

Engineer:

Danielle Lee, Montgomery Associates
Office Phone: (608) 839-4422 Email: danielle@ma-rs.org
