Subject: Schedule for required Dam Inspections in Rock County, WI.
Indianford Dam, Key Sequence Number 608, Field File #53.04

Dear Dam Owner,

I am writing to inform you that you are responsible for hiring a registered professional engineer in 2013 to inspect your dam. When you have chosen your engineer, please have him or her contact me prior to scheduling the inspection to determine how best to review the DNR files for the dam. Once your consultant engineer has inspected the dam, the consultant has 90 days in which to submit an inspection report to the DNR for review and concurrence of the required maintenance or repairs.

Your full inspection schedule for the next 10 years is available on our Dam Safety web pages at <http://dnr.wi.gov/org/water/wm/dsfm/dams/index.html>. You may also find information about hiring engineers and other important information related to dams and the inspection program such as checklists required for the submittal, report templates and timeframes.

We are constantly improving the validity of information in the database of all dams in the state of Wisconsin. If you see inconsistencies or errors that have not been corrected, please call me at (608) 275-3316, or email me at robert.davis@wisconsin.gov.

To stay in touch with what's going on in the Wisconsin Dam Safety Program, subscribe to Dam Safety News/Dam Information - electronic newsletter highlighting news and updates for dam owners, consultants, and other interested parties. To sign up please visit us at <http://dnr.wi.gov/org/water/wm/newsletters.html>.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rob Davis'.

Robert Davis
