

DNR is seeking input on lake levels. Action needed by March 13

[View this email in your browser](#)

WE NEED YOUR INPUT!

Email comments to:
DNRKOSHKONONGWATERLEVELS@wisconsin.gov

We are looking for interested individuals to write or email the DNR and let them know how 7.2 inches of water in low water periods will stimulate tourism and spending on

LAKE KOSHKONONG

There is still time to tell the DNR what you think! March 13 is deadline!

To ensure it gets into the DNR's hand in time, we recommend you email your letter to: DNRKOSHKONONGWATERLEVELS@wisconsin.gov

Please send the DNR a letter supporting a higher summer target water elevation on Lake Koshkonong, intended to improve navigation, safety, recreation and fish habitat on the lake.

All Mail must be received by March 13!

Mail:

Steve Ales
Department of Natural Resources
3911 Fish Hatchery Road
Madison, WI 53711

What property owners have to say:

"Tourists will return to our area and business owners will prosper"

"increasing the water depth another 7", would raise the property value of most waterfront owners on Koshkonong"

"Raising the lake level would significantly improve our dock situation and our boating enjoyment."

"DNR has the capability to impact the economic health of Lake Koshkonong"
