Russ –

We are working on the method to complete a remotely sensed canopy measurement going back to 2009, and for every year we have the NAIP imagery (including into the next several years). We do not yet have results, but it is in process. Let me know if you have any questions.

Thanks!

Andy

**Subject:** Lake Koshkonong Evaluation

Hi All,

This past June there were plans to conduct some baseline evaluation activities on the wetlands surrounding Lake Koshkonong. These were to be, in some plans, coupled with previous data to provide a better picture. I have a meeting with the district coming up on October 18 and it would be good to have information on what was done and the results so far. If you could, please let me know what activities were actually completed and an executive summary of what was found by COB on October 17, so I can have this information for the meeting on the 18<sup>th</sup>. If nothing was done, I need to know that also.

Thanks much for your help!!

Russ
